

Pupil Progress and Attainment Information 2018

As a part of our rigorous and on-going self-evaluation, we analyse how well our pupils at Cirencester Deer Park School do in comparison to their peers.

Below are some headline statistics from the GCSE results for 2016 with comparisons to results for Gloucestershire and the whole of England:

- Our school's provisional Progress 8 measure, which tracks the progress of pupils in comparison to other pupils nationally with the same KS2 attainment across a range of subjects, was -0.05. The national average Progress 8 figure was 0.00 and the average for a secondary school in Gloucestershire was -0.02. This places us as an average school for progress. Progress was good in Maths and particularly good in Science (and the 'EBacc Bucket'). This continues the schools' trend for delivering progress at or above the national average.
- Our school's Attainment 8 measure, which is a score based on how well pupils have performed in up to 8 qualifications including Maths, English, 3 English Baccalaureate subjects plus 3 other approved qualifications, is 47.7. This is above the national average for schools (44.3).
- Another main measure is the percentage of pupils achieving a 'strong' pass (9-5 grade) in both English and Maths (known as 'Basics'). For Cirencester Deer Park School this was 46%, well above the national average which was 39.9%.
- 32% of the Year 11 pupils in 2016 achieved the 'English Baccalaureate' (5 or more 9-5 grades in English, Maths, two Sciences, a Language and a Humanities subject). This was in line overall with all schools nationally (35.1%), and for schools in Gloucestershire (34.7%).

These results demonstrate that Cirencester Deer Park School provides opportunity for pupils to excel in their studies. Our next step is to improve further. We have identified areas we can improve and our current pupils in Year 11 are focusing hard on maximising their potential. At Cirencester Deer Park School, we challenge all of our pupils to achieve more than they first think is possible and be the best they can be every day.
